ABSTRACT

The study entitled "The Level of Awareness Attributed Towards the Socio Economic Factors of Working Students in Bulacan State University, Sarmiento Campus: Pragmatic Approach" investigates and conduct a research to have a good understanding to the perception of the working students in the socio economic factors.

Working while studying is becoming an increasingly common phenomenon among students in the Philippine higher education system. As being observed the number of students undertaking term-time employment grew every year. Higher education becomes an important issue within the knowledge-based economy.

The first part of the research is the introduction of the study and identifying the socio economic factors of the working students that is being related to their industry. As being perceived by the researchers there are four (4) socio economic factors of the working students should relate on and these are: Education, Income, Employment and Health.

The study also provides relevant related literature and studies in foreign and local. These are all about the working students and the socio economic factors which are the education, income, employment and health. The researchers summarized important ideas, concepts and narration from the internal books, journals, reports, articles, unpublished studies, and blogs that will assist the study.

To measure the awareness in socio economic factors, the researchers gathered information by using survey questionnaires. The survey questionnaire is the form of

rating scale. The questionnaire aims to investigate the impact and awareness of the working students in socio economic factors. This method used by the researchers in the study is a descriptive method.

Presentation, interpretation and analyzation of the data gathered sees on the study. The total computation from the survey questionnaire indicated in the tables show the percentage of the demographic profile of respondents and how much aware is the working students in socio economic factors.

For the finishing point of the study, it includes the summary of findings which interpreted from the previous chapter, the conclusion which analyzed also from previous chapter and the recommendation which are the solution from the collected data base on the research to be advise to the academe, establishment and future researchers.
